## Profile

---

Electronics Engineering student with a strong interest in Internet of Things (IoT) systems and industrial automation. Possesses solid analytical skills and technical understanding of control systems and digital technology. Highly adaptive to new environments and challenges, capable of learning new technologies quickly, and committed to working in a systematic and disciplined manner.

Beyond technical expertise, I possess project management and complex problem-solving skills that contribute to operational efficiency. Supported by strong communication skills and the confidence to express ideas, I am capable of coordinating and collaborating effectively within professional teams. I am eager to further develop my competencies and make meaningful contributions to the engineering field

## Experience

---

### **PT Kereta Api Indonesia DAOP 4**

#### **Facilities Maintenance Staff (Intern) | Jan - June 2022**

- Supported the maintenance of railway electrical systems.
- Conducted inspections and troubleshooting to ensure operational reliability.
- Contributed to improving safety standards and maintenance efficiency.
